Summary

I am a self-taught web developer with several years commercial experience. I specialize in Ruby on Rails development with MySQL databases. I markup pages with semantic XHTML and style them with CSS adhering to W3C specification when possible. This is often combined with javascript to create dynamic and engaging user interactions. I have solid PHP skills backed by three years of professional experience. I have built out several high profile sites using Drupal and have contributed the User Relationships module back to the Drupal community. I am an efficient and self-motivated learner.

Skill Set

Software

Subversion
TextMate
Adobe CS 2/3
Microsoft Office
NeoOffice

Programming

XHTML
CSS
Javascript
Ruby
PHP 4/5 (Object Oriented)
MySQL
Ruby on Rails
Drupal

Operating Systems

Mac OS X
MS Win 95/98/2K/XP/Vista
Ubuntu
Gentoo
FreeBSD

Experience

The New School of Erotic Touch

Web Developer / SysAdmin

December 2005 - April 2008

I am their only technologist. I built their servers from the ground up. This required custom compiling many packages (postfix, imap, sasl, mysql, apache). I also built the site in Ruby on Rails.

OurChart Inc.

Web Developer

August 2007 - September 2007

Wrote the User Relationships Drupal module. They were good enough to let me release it back to the Drupal community.

The Healthy Prostate

Web Developer

June 2007 - September 2007

Built their site in Drupal. This required me to set up all datatypes and convert the designer's PSD's to a Drupal template.

Hot House Backroom/Dungeon

Web Developer

November 2006 - April 2007

Hot House is a gay pornography company and this site contains graphic images. I built the content management system and front-end in Ruby on Rails. I continue to maintain the software as necessary.

Vintage 59

Web Developer

November 2006 - December 2006

Create the full site from the designer's Photoshop mockups using XHTML, CSS, and PHP.

The Bonnie J. Addario Lung Cancer Foundation

Web Developer

Created a WordPress theme for them. Built an application in Ruby on Rails that accepts recurring donations.

November 2006 - December 2006

Hot House Be a Model

Web Developer

Rebuild an existing web app to accept new model applications. This was rebuilt in Ruby on Rails.

October 2006 - November 2006

Infinite Creation

Web Developer

Turn a jpg from the designer into a full fledged website using XHTML and CSS.

July 2006 - August 2006

Three Dimention Publishing

Web Developer

Turn a jpg from the designer into a full fledged website using XHTML and CSS.

July 2006 - August 2006

Hot House Store

Web Developer

Rewrite the XHTML/CSS of the entire site to be more efficient and semantically correct. The results were to reduce the CSS to 1/3 the original size and the overall page size by half.

May 2006 - October 2006

Santa Clara Vanguard

Visual Technician

Teach members of the corps how to march. Clean the visual side of the show.

November 2004 - August 2006

GPM

Web Developer / Designer

Designed and implemented a company web presence.

October 2004 - November 2004

Hooper Insurance Services

Web Developer / Designer

Designed and implemented a company web presence.

August 2004 - September 2004

NTD Stichler Architects

Senior Archive Consultant

Created an indexed archive system for in-house architectural drawings.

January 2003 - January 2004
